Artificial Intelligence-Introduction

Chapter 1

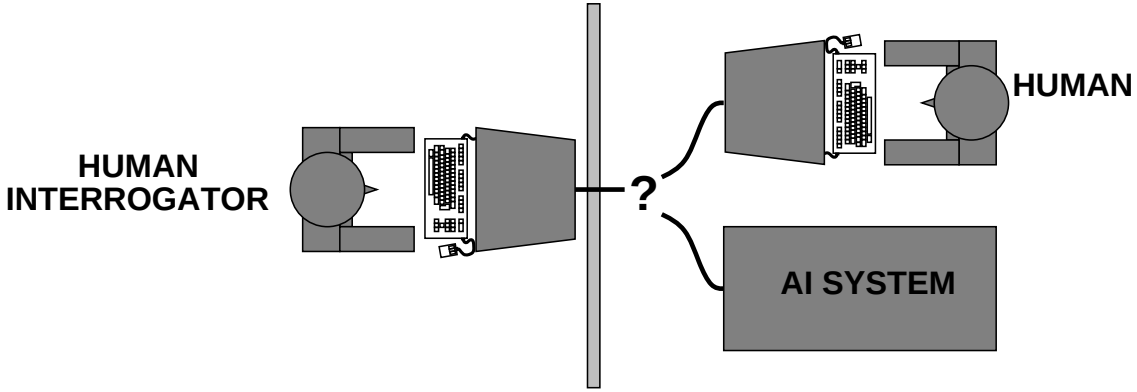
Outline

- ♢ What is AI?
- ♢ A brief history
- ♢ The state of the art

What is AI?

Systems that think like humans	**Systems that think rationally**
Systems that act like humans	**Systems that act rationally**

Acting humanly: The Turing test



Turing (1950) "Computing machinery and intelligence":

♢ Anticipated all major arguments against AI in following 50 years
♢ Suggested major components of AI:
knowledge representation : to store what it knows or hear.**Automated reasoning**: to use the stored information to answer questions and to draw new conclusion. **Natural language processsing(NLP)** : to enable the machine to communicate successfully.**Machine learning** :to adapt new circumstances and to detect and extapolate patterns.**Computer vision** : to perceive objects.**Robotics** : to manipulate objects and move around.

Thinking humanly: Cognitive Science

1960s "cognitive revolution": information-processing psychology replaced prevailing orthodoxy of behaviorism

Requires scientific theories of internal activities of the brain

– What level of abstraction? "Knowledge" or "circuits"?

– How to validate? Requires

1) Predicting and testing behavior of human subjects (top-down)

or 2) Direct identification from neurological data (bottom-up)

Both approaches (roughly, Cognitive Science and Cognitive Neuroscience) are now distinct from AI

Both share with AI the following characteristic:

the available theories do not explain (or engender) anything resembling human-level general intelligence

Hence, all three fields share one principal direction!

Thinking rationally: Laws of Thought

Normative (or prescriptive) rather than descriptive

Aristotle: what are correct arguments/thought processes?

Several Greek schools developed various forms of logic:
notation and **rules of derivation** for thoughts;
may or may not have proceeded to the idea of mechanization

Problems:
1) Not all intelligent behavior is mediated by logical deliberation
2) What is the purpose of thinking? What thoughts **should** I have out of all the thoughts (logical or otherwise) that I **could** have?

Acting rationally

Rational behavior: doing the right thing.

The right thing: that which is expected to maximize goal achievement,
given the available information doesn't necessarily involve thinking—e.g.,
blinking reflex—but
thinking should be in the service of rational action

Rational agents

An agent is an entity that perceives and acts.

This course is about designing rational agents.

Abstractly, an agent is a function from percept histories to actions:

$$f : \mathcal{P}^* \rightarrow \mathcal{A}$$

For any given class of environments and tasks, we seek the agent (or class of agents) with the best performance

Caveat: **computational limitations make perfect rationality unachievable**

$\rightarrow$ design best program for given machine resources

AI prehistory (Foundations)

Philosophy	logic, methods of reasoning
	mind as physical system
	foundations of learning, language, rationality
Mathematics	formal representation and proof
	algorithms, computation, (un)decidability, (in)tractability
	probability
Psychology	adaptation
	phenomena of perception and motor control
	experimental techniques (psychophysics, etc.)
Economics	formal theory of rational decisions
Linguistics	knowledge representation
	grammar
Neuroscience	plastic physical substrate for mental activity
Control theory	homeostatic systems, stability
	simple optimal agent designs
Computer Engineering	High Preformence Computing(HPC)

Potted history of AI

1943	McCulloch & Pitts: Boolean circuit model of brain
1950	Turing's "Computing Machinery and Intelligence"
1952–69	Look, Ma, no hands!
1950s	Early AI programs, including Samuel's checkers program, Newell & Simon's Logic Theorist, Gelernter's Geometry Engine
1956	Dartmouth meeting: "Artificial Intelligence" adopted
1965	Robinson's complete algorithm for logical reasoning
1966–74	AI discovers computational complexity Neural network research almost disappears
1969–79	Early development of knowledge-based systems
1980–88	Expert systems industry booms
1988–93	Expert systems industry busts: "AI Winter"
1985–95	Neural networks return to popularity
1988–	Resurgence of probability; general increase in technical depth "Nouvelle AI": ALife, GAs, soft computing
1995–	Agents, agents, everywhere . . .
2003–	Human-level AI back on the agenda

State of the art- Exercises

Which of the following can be done at present using computers or Intelligent methods?

♢ Play a decent game of table tennis?

State of the art

Which of the following can be done at present?

- ♢ Play a decent game of table tennis?
- ♢ Drive safely along a curving mountain road?

State of the art

Which of the following can be done at present?

- ♢ Play a decent game of table tennis?
- ♢ Drive safely along a curving mountain road?
- ♢ Drive safely along the central of Ryiadh?

State of the art

Which of the following can be done at present?

- ♢ Play a decent game of table tennis?
- ♢ Drive safely along a curving mountain road?
- ♢ Drive safely along the central of Ryiadh?
- ♢ Buy a week's worth of groceries on the web?

State of the art

Which of the following can be done at present?

- ♢ Play a decent game of table tennis?
- ♢ Drive safely along a curving mountain road?
- ♢ Drive safely along the central of Ryiadh?
- ♢ Buy a week's worth of groceries on the web?
- ♢ Buy a week's worth of groceries at Banda's supermarket?

State of the art

Which of the following can be done at present?

- ♢ Play a decent game of table tennis?
- ♢ Drive safely along a curving mountain road?
- ♢ Drive safely along the central of Ryiadh?
- ♢ Buy a week's worth of groceries on the web?
- ♢ Buy a week's worth of groceries at Banda's supermarket?
- ♢ Discover and prove a new mathematical theorem?

State of the art

Which of the following can be done at present?

- ♢ Play a decent game of table tennis?
- ♢ Drive safely along a curving mountain road?
- ♢ Drive safely along the central of Ryiadh?
- ♢ Buy a week's worth of groceries on the web?
- ♢ Buy a week's worth of groceries at Banda's supermarket?
- ♢ Discover and prove a new mathematical theorem?
- ♢ Design and execute a research program in molecular biology?

State of the art

Which of the following can be done at present?

- ♢ Play a decent game of table tennis?
- ♢ Drive safely along a curving mountain road?
- ♢ Drive safely along the central of Ryiadh?
- ♢ Buy a week's worth of groceries on the web?
- ♢ Buy a week's worth of groceries at Banda's supermarket?
- ♢ Discover and prove a new mathematical theorem?
- ♢ Design and execute a research program in molecular biology?
- ♢ Write an intentionally funny story?
